

**MASSIVO**

# Massivo Masternode setup Guide

## Prerequisite:

- 2500 MASS Coins.
- Ubuntu 16.04 VPS
- Local wallet massivo-qt installed on your computer

**Step 1:** Generate a receiving address on your local wallet and send exact 2500 MASS and wait for minimum 13 confirmations.

### Payment information

URI: `massivo:MRFsK1xKDz3dYKsh1qWYpQVKAPfAdxdRyw`

Address: `MRFsK1xKDz3dYKsh1qWYpQVKAPfAdxdRyw`

**Step 2:** Go to wallet > debug console and enter below command

```
masternode genkey
```

You will generate your **MN\_GENKEY** which will be something like below. Store this for later reference.

```
<-masternode genkey
```

```
7Uy2zUV3L9K6mhrH8tbaovoxnaentN752SSXprpGiCoC1M1Y3vU
```

**Step 3:** Enter the below command again in debug console

```
masternode outputs
```

You will see your **output** and **TX\_ID** like below.

```
<-masternode outputs
```

```
->{
```

```
  "2bcd3c84c84f87eaa86e4e56834c92927a07f9e18718810b92e0d0324456a67c": "0"
```

```
}
```

**Step 4:** Edit masternode.conf file and update the config file as per below format
